SonoCine Breast Ultrasound Instructions

You have been scheduled for a SonoCine Breast Ultrasound for ________ on ________ at ________

the Renown Breast Health Center, 901 E. Second St. suite 103.

SonoCine Breast Ultrasound is a thirty minute, painless procedure using computer-guided technology to scan your breasts. The ultrasound is recorded in a cine loop for careful review by a radiologist.

Before the Procedure:

• You may eat and drink as normal the day of the procedure.
• Wear a top and bra that are easily removed.
• Bathe before the procedure.

During the Procedure:

• You will undress from the waist up and be given a camisole to wear during the ultrasound.
• You will lie on your back on a table with your arms above your head.
• A custom nipple pad is placed over each nipple which provides a smooth surface for continuous probe contact. The camisole then covers the nipple pads.
• Gel is placed on top of the camisole, covering the entire breast area.
• The probe will move down your breast in overlapping linear rows, from the axillary area to your sternum.
• To watch a video of this procedure and for additional information, visit www.renown.org/sonocine.

After the Procedure:

• After the ultrasound is completed you may get dressed and go home. You may carry on your day as usual.
• The Sonocine will then be examined by a radiologist and a report will be sent to your primary care physician.
• You will receive a letter stating the results of the Sonocine. If additional imaging is needed, you will be contacted by the Renown Breast Health Center.

If you have any questions, please call 775.982.4186 and ask to speak to one of our technologists or Nurse Navigator.

Consent forms must be signed prior to taking any type of mind-altering medication or the procedure cannot be preformed and the patient will have to reschedule the exam.
