Ostomy Care
Exceeding Healing Rate Standards

All aspects of ostomy care are carefully managed and include assessment, communication with physician, individualized treatment, and state-of-the-art therapies and products. Staff specializes in the treatment of non-healing wounds associated with a variety of conditions including diabetes, surgery or trauma, burns and pressure. Ostomy care includes:

· Colostomies, ileostomies, urinary diversions, continent diversions, fistulas/tubes
· Pre-surgical ostomy markings and education
· Treatment and prevention of skin complications
· Resource utilization
· Multidisciplinary care

To make an appointment, obtain a referral from your physician. Bring your insurance card, medical records, list of allergies and medications, and co-payment to your appointment. Keeping scheduled appointments is crucial for wound healing.
